

CEILING-ATTACHED MULTIMEDIA PLAYER

ABSTRACT

A ceiling-attached multimedia player combines a display device and a
5 flipping multimedia player in a base. The base is fastened to the inner side of
the car top and houses the flipping multimedia player. The base also has a
bottom edge pivotally coupled with the flipping display device which holds a
display screen visible to rear seat passengers. The ceiling-attached multimedia
player thus constructed is easy to install and operate.
